State Superintendent
of Public Instruction

Attendance Figures

- Average Daily Attendance (ADA)

Funding for California public schools is attached to each school's average daily attendance (ADA)

Each student's presence at school each day equates to \$35 per day in funds from the state

Example: If 1 student attends school 5 consecutive days: $1 \times \$35 \times 5 = \175 in weekly funds the school receives from the state just for that student!
